

## WHAT IS A THERMOSTATIC MIXING VALVE?

A thermostatic mixing valve has a wax filled thermostat cartridge that blends hot water with cold water to ensure constant safe water outlet temperatures, even if other taps or appliances are used at the same time.

The valve shuts off rapidly in the event of a hot or cold supply failure, to prevent scalding or thermal shock, providing increased safety whilst showering.

The use of a thermostatic valve rather than a manual system gives user comfort because the mixer water temperature remains constant.

### Therm-Oz Thermostatic Shower Features:

- ✓ Constant temperature
- ✓ Safety temperature set button
- ✓ Safe for children & elderly
- ✓ Cool-touch technology
- ✓ Easy to operate
- ✓ Water saving
- ✓ Watermark approved valve

THERMOSTATIC SHOWERS

On-Off & Flow Adjustment:  
Simple twist action.

Temperature Adjustment: Set at 38°C with over-ride button to increase temperature.

#### New to Australia!

- ✓ Constant temperature
- ✓ Safe showering
- ✓ Simple to use
- ✓ Cool-touch technology
- ✓ No electrics
- ✓ Fully approved

HOW A SHOWER SHOULD BE!

HOW YOURS COULD BE!

No sudden *cold spells* if other taps are used in the property.

No sudden *hot spells* if the toilet is flushed or a running washing machine.

Cool-touch technology is safe for children & elderly with the low surface temperature of the valve.

IF YOU HAVE A TWO TAP SHOWER SIMILAR TO THESE:

**These can be easily replaced!**

Using our Australian registered design and patent protected Therm-Oz Reno-Kit RK001, your plumber can remove your two tap style shower and replace with our Thermostatic valve and slide rail kit, with no pipework or tiling alteration, even if your handles are fitted vertically.

The Reno-Kit RK001 does not convert a single lever mixer shower.

SHOWERS PTY. LTD

## For Renovations

The Therm-Oz Reno-Kit pack RK001 includes the CT100 Thermostatic valve, adjustable slide rail kit, and all components to convert from the two tap system.

The old shower outlet becomes blanked off creating a useful hanging feature.

The slide rail is fixed at a favourable height and position.

A more efficient and safe way to mix water.
